sssiva.1999@gmail.com

Velachery, Chennai - 42.

sivanesh.tv.netlify.app

Product designer with 3 years of experience shipping enterprise interfaces for complex, high-stakes software. Works structure-first — frameworks and rules before screens. Pairs closely with engineering, comfortable in ambiguity, and strongest when the problem is still being defined.

SKILLS

- Information Architecture
- Interaction Design
- Design Systems
- Prototyping
- Structural UX
- Engineering Handoffs

TOOLS

Figma	
Claude suite	
Lovable	
Cursor	
AI studio suite	

EXPERIENCE

PRODUCT DESIGNER

FlytBase

2024 Mar- 2026 Apr

- Redesigned the primary drone control interface used by operators in safety-critical flight environments, building a structured rule system for every category of system feedback. Shipped as the enterprise standard across all deployments.
- Designed a command environment for a single operator managing multiple live drones simultaneously, built to serve two distinct user roles — pilot and fleet manager — within one interface. The information architecture became supporting evidence in a regulatory compliance submission.
- Built the company's first infrastructure management product from scratch — a tool for operators to register, inspect, and report on physical assets managed by drones. Launched as FlytBase's second standalone product.

PRODUCT DESIGNER

VB Ceramic Consultants (VBCC)

2023 Jun- 2024 Feb

- Designed researcher-facing and commercial websites for two business units, improving accessibility and sales conversion.
